FIREPLACES

TABLE-TOP FIREPLACES

The background image shows a warm, inviting interior space. The ceiling is a complex, dark-colored lattice or carved wood structure. The walls are covered in a dense, patterned wallpaper. In the foreground, a dining table is set with a white tablecloth featuring a subtle floral pattern. On the table are several bowls of food, including what looks like soup and bread. Two tall, cylindrical glass fireplaces with a flame inside are placed on the table. In the background, there are more tables and chairs, and a large potted plant. The overall atmosphere is cozy and elegant.

If you find something lacking, please be harsh with us, let us know immediately, but allow us to improve on our mistakes, and to earn your admiration. Your suggestions and criticism are our fuel and your word of praise - well that just makes our day!

what are Table-Top Fireplaces

We introduced Table-top fireplaces in 2019 keeping in mind Indian homes, social events, weather and architecture. These are portable designs that are extremely convenient to use and easy on the pocket.

USES

- Ideal for Roof-top and Outdoor dinners
- Perfect for Cafes, Outdoor parties, and Fine-dining restaurants
- Portable enough to be carried along on your holidays
- Can be burnt indoors (with ventilation) or outdoors.
- Can be kept on any kind of surface - wood, or stone, or glass.

HEATING & AMBIENCE

All designs create some amount of heat since it is real fire. But most of them are designed to create the perfect **fire-side** ambiance, and thus can be used **around the year in any weather.**

BURN TIME

Each design burns for 50-60 minutes on a single refill of BioFuel liquid irrespective of size. The Fuel used should only be ordered from the website to avoid contaminated fuel.

HOW-to-USE

- To light, simply pour the fuel in, and light it with a match or lighter.
- The turn-off, cover the burning flame with the Lid provided to cut off oxygen
- In case of any spills outside the fireplace, put out the fire with sand, not water
- Do not pour fuel into a burning flame. Wait for the flame to be put out.
